

EVERYONE'S TALKING ABOUT...

The Safe-T-Chair®

We have had the pleasure to use several of the automatic locking wheel chairs made by Jerry Ford. They are great to use for any resident who suffers from any type of dementia. After using the wheel chairs we noted the number of falls decreasing dramatically. Jerry Ford was very easy to work with and any time we had a question or needed something he responded within the same business day. I would strongly encourage the use of the automatic locking wheel chair for any resident with dementia who is having high number of falls or forget to lock the chair when attempting to stand up.

*-Kelly Talamantes - Reminiscence Coordinator
Sunrise Cottages of Rochester*

"I've been in the business of selling wheelchairs for 8 years in nursing homes, assisted living facilities, and private residences. I've seen a lot of new products over the years, but none of them can help prevent falls like this can. You have created a great product for this industry. I look forward to marketing it throughout the state of Nebraska, which will be very easy as I think the chair speaks for itself."

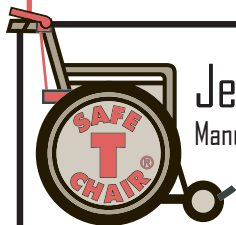

*-Greg Zimelman-Owner
Mid Nebraska Mobility (JFC Nebraska Dealer)*

As one of the leading manufacturers of manual and power wheelchairs in the world, we have had the privilege to work with The Jerry Ford Company this past year. Jerry Ford's invention of his locking systems are clearly ingenious and have proven to be an added value safety feature on our Everest & Jennings wheelchairs. Acute-care, eldercare as well as any homecare environments around the world would benefit greatly from Jerry Ford's devices.

*-Allison Stackpole - Director of Sales Development and Training
Homecare Inside Sales*

"We have been in the wheelchair business serving clients throughout the world since 1967. Over the years we have encountered many new ideas to improve the wheelchair. This simple yet effective wheel lock system ranks near the top. We have seen other types of automatic locking systems for wheelchairs yet they have draw backs such as they do not allow the wheelchair to be folded. We see this braking system being very attractive to those living with Alzheimer's disease, dementia, and memory loss."

*-Steve Forliti-Owner/Manager
Anderson's Wheelchair Inc. (JFC Minnesota Dealer)*
